# Date of preparation: 02/11/11

### SECTION I

Manufacturer	: DECK-O-SEAL, A DIVISION OF W. R. MEADOWS, INC.	- H M I S -	
Address	: 300 Industrial Drive	Health	:1
	: Hampshire, Illinois 60140	Flammability	:2
		Reactivity	:0
Telephone #	: (847) 683-4500	Personal Protection	: 1
Emergency #	: 1-800-424-9300 Chemtrec		
• •	(Hazard Rating: 0=	Least,1=Slight,2=Moderate	,3=High,4=Extreme,*=Chronic)
Product Class	: DIVISION 3		
Mfg. code I.D.	: 3566000-1		
Trade Name	DECK-O-GRIP		

## SECTION II-A HAZARDOUS COMPONENTS

					% by	SARA	VAPOR PRESSURE	LEL
No.	Component			CAS#	Weight	313	(mm Hg @ 20 C)	(@ 25 C)

#### SECTION III **PHYSICAL DATA Boiling Point** : 322 degrees F % Volatile by volume : N/E **Evaporation Rate** : < 1 (ether = 1) % Volatile by weight : 73.00 (Theoretical) : > 1 (air = 1) Vapor Density Weight per gallon : 7.7 (Theoretical) pH Level : Not applicable Appearance : Clear colorless liquid VOC Content 5.7 Pounds/Gallor

## SECTION IV HEALTH INFORMATION

**EYE CONTACT:** This product is presumed to be moderately irritating to the eyes. Exposure may cause corneal injury. Product vapors and/or mists may also be irritating to the eyes.

**SKIN CONTACT:** This product is presumed to be moderately irritating to the skin. Prolonged contact may cause damage to the skin. P rolonged or repeated contact may result in defatting and drying of the skin which may result in dermatitis.

**INHALATION:** Exposure may produce irritation to the nose, throat, respiratory tract, and othe r mucous membranes. Exposure to excessive vapor concentrations may cause signs of transient central nervous system depression (e .g., headache, drowsiness, loss of coordination, and fatigue). Reports have associated repeated and prolonged occupational overexposure to solvents with permanent brain and nervous system damage. Deliberately concentrating and inhaling the contents may be harmful or fatal.

**INGESTION:** This product is presumed to be slightly toxic. Small amounts of liquid aspirated into the lungs during ingestion or from vomiting may result in severe lung damage. While this material has a low degree of toxicity, ingestion of excessive quantities may cause signs of central nervous system depression (e.g., headache, drowsiness, loss of coordination, and fatigue).

**SIGNS AND SYMPTOMS:** Symptoms of eye irritation include pain, tearing, reddening, and swelling. Symptoms of skin irrit ation include reddening, swelling, rash, and redness. Symptoms of respiratory irritation include runny nose, sore throat, coughing, chest discomfort, shortness of breath, and reduced lung function. Symptoms of gastrointestinal irritation include sore throat, abdominal pain, nausea, vomiting, and diarrhea. Transient central nervous system depression may be evidenced by headache, dizziness, nausea and symptoms of intoxication; in extreme cases, uncon sciousness and death may occur. Symptoms of chronic overexposure include loss of memory, loss of intellectual ability, and loss of coordination.

AGGRAVATED MEDICAL CONDITIONS: Pre-existing skin, eye, and respiratory disorders may be aggravated by exposure to this product OTHER HEALTH EFFECTS: None recognized.

# Date of preparation: 02/11/11

# SECTION V EMERGENCY AND FIRST AID PROCEDURES

**EYE CONTACT:** If irritation or redness develops, move victim away from exposure source and into fresh air. Flush eyes with water for fifteen(15) minutes. If symptoms persist, seek medical attention.

**SKIN CONTACT:** Remove contaminated shoes and clothing. Cleanse affected area(s) thoroughly by washing with mild soap and water. If irritation and redness develops and persists seek medical attention.

**INHALATION:** If respiratory symptoms develop, move victim away from expos ure source and into fresh air. If symptoms persist, seek medical attention. If victim is not breathing, immediately begin artificial respiration. If breathing difficulties develop, oxygen should be administered by qualified personnel. Seek immediate medical attention.

**INGESTION:** Do not induce vomiting. Vomiting will cause further damage to the throat. Dilute by giving water or milk to drink if the victim is conscious. Consult a physician, hospital, or poison control center and/or transport to an emergency facility immediately.

## SECTION VI FIRE AND EXPLOSION HAZARDS

### FLAMMABILITY CLASSIFICATION

- NFPA: Combustible Liquid - Class II

FLASH POINT: 101 degrees F

**EXTINGUISHING MEDIA:** Use water fog, foam, dry chemical, or Carbon Dioxide.

**SPECIAL FIRE FIGHTING PROCEDURES AND PRECAUTIONS:** WARNING : COMBUSTIBLE. Clear fire area of unprotected personnel. Do not enter confined fire space without helmet, face shield, bunker coat, gloves, rubber boots, and a positive pressure NIOSH approved self-contained breathing apparatus.

**UNUSUAL FIRE AND EXPLOSION HAZARDS:** Containers exposed to intense heat from fires should be cooled with water to prevent vapor pressure buildup which could result in container rupture. Container areas exposed to direct flame contact should be cooled with large quantities of water as needed to prevent weakening of container structure.

## SECTION VII REACTIVITY

#### STABILITY: Stable

HAZARDOUS POLYMERIZATION: Will not occur

- DOT: Bulk Shipments Only: Combustible Liquid, N.O.S. (Naphtha, 1,2,4-Trimethylbenzene) NA 1993, III

CONDITIONS AND MATERIALS TO AVOID: Avoid oxidizing materials, strong acids, and strong alkalies. HAZARDOUS DECOMPOSITION PRODUCTS: Combustion may yield Carbon Dioxide, Carbon Monoxide, and/or incomplete combustion products. Do

not breathe smoke or fumes. Wear appropriate protective equipment

## SECTION VIII

## EMPLOYEE PROTECTION

**RESPIRATORY PROTECTION:** Use ventilation as required to control vapor concentrations - at least 10 air changes per hour are recommended for good general room ventilation. If exposure exceeds the PEL/TLV, use the appropriate NIOSH approved respirator.

**PROTECTIVE CLOTHING:** Wear safety glasses, goggles, or a splash shield to prevent eye contact. Contact lenses should not be worn. Wear appropriate gloves and protective clothing to prevent contact with skin and clothing.

ADDITIONAL PROTECTIVE MEASURES: Eye wash fountains and safety showers should be available for use in an emergency.

# SECTION IX ENVIRONMENTAL PROTECTION

SPILL OR LEAK PROCEDURES: LARGE SPILLS>> Evacuate the hazard area of unprotected personnel. Wear appropriate respirator and protective clothing. Shut off source of leak only if safe to do so. Dike and contain. Remove/extinguish ignition sources. If vapor cloud forms, water fog may be used to suppress; contain run-off. Remove with vacuum trucks or pump to storage/salvage vessels. Soak up residue with an absorbent such as clay, sand, or other suitable material; place in non-leaking containers for proper disposal. Flush area with water to remove trace residue; dispose of flush solutions as above. SMALL SPILLS>> Take up with an absorbent material and place in non-leaking containers; seal tightly for proper disposal. WASTE DISPOSAL: Observe all Federal, State and local regulations regarding proper disposal.

# SECTION X ADDITIONAL PRECAUTIONS

Keep liquid and vapor away from heat, sparks, and flame. Extinguish pilot lights, cigarettes, and turn off other possible sources of ignition prior to use and until vapors are gone. Surfaces that are sufficiently hot may ignite product in the absence of sparks or flame. Vapors may accumulate and travel to ignition sources distant from the handling site. Keep containers closed when not in use. Use with adequate ventilation. Containers, even if empty, can contain explosive vapors. Do not cut, drill, grind or weld near containers. Containers can contain hazardous product residues even when empty. Wash with soap and water before eating, drinking, smoking or using toilet facilities.
